

DAILY ACTIVITY REPORT

3 September 1976

SUPPLY DIVISION ITEM OF INTEREST

The two safes which were ordered from Art Metal (Hillside) Inc. for evaluation in July 1975 were received on August 30, 1976. An initial STAT inspection by [] indicates that both units do not meet specification standards. The units are apparently as bad as those which were procured from the same company in 1968 (which are still in stock).

A written report listing the discrepancies will be forwarded to S&B by STAT []. It must eventually be decided whether to accept the loss on the cost of these units or attempt to have the vendor rectify the discrepancies.
